Greenery Management : The Art & Science

The world is going back to nature. Green is in. It is interesting that with each step forwards on the hi-tech road, man is getting pulled back to earth. He is re-discovering his roots. From the love of the few, Greenery is emerging as a universal concern.

Greenery management has grown into a scientific discipline that strives for optimal utilization of continuously depleting natural resources.

The art lies in conceiving a landscape within the given parameters & the science lies in developing and maintaining it.

Behind every outstanding landscape there performs a scientifically designed and well implemented irrigation system.

J.K .AGRI CORPORATION One of the well recognized names in the irrigation field, has been engaged successfully in the discipline of Greenery Management for almost a decade.

Over the years J.K .AGRI CORPORATION has gained valuable insights in the field of irrigation and water management and offers you complete irrigation solutions that are cost effective, value driven and are customized to your requirements.

There is a fundamental difference in the approach of J.K .AGRI CORPORATION and other companies. J.K .AGRI CORPORATION is an innovative irrigation solutions company that steers clear of hit & trial operations.

The Name You Can Trust

J.K .AGRI CORPORATION is a name distinct by experience and distinguished by the trust.

J.K .AGRI CORPORATION irrigations is an irrigation Engineering Company and not merely an irrigation products vendor.

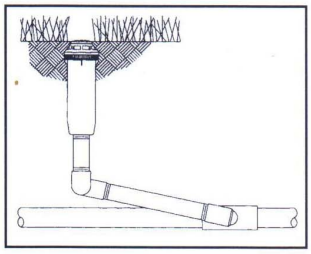

The core of J.K .AGRI CORPORATION is built around the principle of cost effective excellence.

J.K .AGRI CORPORATION designs and implements a project with the help of unmatched on-the-job expertise, experience and resources - both domestic and international.

An irrigation solution from J.K .AGRI CORPORATION comprises of the best available components of finest quality. J.K .AGRI CORPORATION is a systems specific and not the product specific company. The result is a user friendly, well synchronized solution with optimum output levels at surprising economy.

When you choose J.K. AGRI CORPORATION, You obviously, logically choose the best.

J.K. AGRI CORPORATION AGRICULTURAL IRRIGATION SYSTEMS

Modern irrigation Systems for All Types of Crops

In tune with technology, in touch with the roots, the Company, since its inception has been dedicated to the cause of Green Revolution.

The Company has been engaged in developing comprehensive water management strategies and systems that address the critical issues of Natural Resource Conservation and Better Yield.

The Company has successfully delivered the products and systems that are high performing, dependable and cost effective.

Sprinkler Systems / Drip Irrigation / Micro Sprinkler & Green House Irrigation

Netafin Sprinkler system incorporates made of high density polyethylene (HDPE), which have the following significant advantages :

Flexibility, Corrosion resistance, High impact strength, Chemically inert, Unaffected by scorching sun.

Netafin Sprinkler system is specifically designed for the Indian farming conditions & needs, easy to install, light in weight, rugged and easy to maintain.

There are three types of Sprinkler Systems :

Permanent System :

The piping network is designed to cover all of the farm land and is installed permanently underground.

Solid State System :

The piping is designed to cover all of the farm land, is overground and removed from the field only at the end of the season.

Portable System :

The piping is overground, But covers only a section of the farm land, and is moved to another section of the field after each irrigation cycle so as to cover all of the farm land in multiple settings before the irrigation cycle is to be repeated.

Drip Irrigation :

Drip Irrigation systems deliver the precise amount of water, fertilizer and chemicals thus not only saving water and energy but also maximising crop production. These high quality, low volume irrigation systems are excellent choice for vineyards, nurseries, orchards, vegetable / flower beds etc.

Micro Sprinkler :

These small superior durable plastic sprinklers offer uniform distribution of fine spray of wide ranges for variety of applications. Ideally suitable for vegetables, in and outdoor nurseries, green houses, orchards and flower beds.

Misters & Foggers :

Misters and foggers are used to produce mist or fog in the green house to create a specific climatic condition (humidity & temperature control). Available in variety of discharge ranges. Highj discharge nozzles provide irrigation simultaneously.

Drip Emitters

Drippers emit one drop of water at a time with uniform fow of 2 to 8 LPH. Available in 'Pressure Compensatory' & 'Non-Pressure Compensatory' types. Water requirement of the crop determines the number & type of emitters. Ideally suitable for trees, nurseries, horticulture, green houses etc.

Strip Drip-Lines

Low precipitation rate of closely spaced inbuilt drippers at regular distance in the tubing creates a continuous and uniform wet strip. Ideally suitable for seasonal crops, row crops, flower beds etc.

Here are the different types of sprinkler heads

Impact sprinklers
For watering medium to large lawn areas. Utilizes an efficient impact drive mechanism

Closed case sprinklers
For quiet, low maintenance watering of medium to large lawn areas, Or where grit, sand or heavy grasses are a problem

Spray heads
For watering small, medium and irregularly shaped areas. Durable and economical

Bubblers
For flower beds, rose gardens, fruit trees or any planting area where direct water on foliage is undesirable.

Landscape Systems

Sports fields & courts

Parks

Industrial / commercial

Golf courses

J.K. AGRI CORPORATION is one of the leading designer & consultant of Hi-tech landscape irrigation / Drip and micro sprinklers systems.

Trust J.K. AGRI CORPORATION for total landscape irrigation solutions. whatever be your irrigation requirement, for factory garden, farm houses, Hotel & Resorts, Golf courses, Cricket Stadium Ground, Commercial Complexes, Sport Fields, Amusement & Recreation parks, Orchards, Nurseries, Plantation or anything on irrigation / water management, get in touch with us.
